

Top Business strategist taps into 15+ years of industry know-how to help others learn...

Little Known Tactics To Grow Your Business Rapidly And Efficiently — Dominating Your Market Space And Exploding Your Bottom Line!

From the Desk of: Gwendolyn L. Young:

Dear Entrepreneur,

Do you feel confused and frustrated because you don't know which direction to take your business?

Are you overwhelmed, exasperated, and desperate because the strategies you're using are bleeding your company's assets dry?

Hi, I'm Gwendolyn Young, and for almost two decades I've helped business owners like you, grow their ventures rapidly, and cost-effectively. **My strategies have taken clients into the six-figure range**, and I've had the privilege of working with industry giants such as: Wendy's, Macy's, United Insurance, and Lewis University.

I wasn't always a top-gun of the consulting industry...

My journey started back in 2009, when my mother pitched me the idea to start a non-profit organization. Her concept was an establishment to teach young ladies practical, street-wise entrepreneurial skills they could use for a lifetime.

Her proposal was noble, for sure.

However, the thought of working with teen women, burdened with self-esteem concerns, emotion swings, changing bodies, and depression issues wasn't my idea of a logical career move. While I had over 15 years of corporate and administrative experience, nothing prepared me for the gauntlet thrown down by my mother!

Entering the nonprofit world was a terrifying venture. I had little training, few resources, and finding a mentor was out of the question. There wasn't a staff to help me, or board of directors to guide me, and the business was operating out of my mother's basement. Even though I was flying solo without a navigator, I pledged myself to make it work. I gritted my teeth and prepared for battle.

From Left Field —A Cruel Twist Of Fate

Over the first months of my project, I began experiencing bouts of fever and fatigue as well, as a stiffness and pain in my joints and swelling. I began seeing doctors and having tests run to find out what the problem was. It was a very difficult time for me; I was so sick, and it was hard running the organization my mother and I had started. I didn't want to let my mother, or the young women I was trying to help down.

Unfortunately, the diagnosis of the doctors was not what I wanted to hear, but it was very conclusive... I had Lupus.

In case you don't know, Lupus is an autoimmune disease that can damage just about any part of your body. It's a chronic disease because the symptoms can last longer than five weeks and often for many years. You can imagine what it would feel like to be sore, sick and tired for months on end.

However, I am not a quitter, nor do I take any challenge lightly.

As Napoleon Hill used to say, "***Within every setback or obstacle or disadvantage there is the seed of an equal or opposite or greater advantage or benefit.***"

I became more determined than ever to work through my illness and have the organization we started succeed.

A Strange, Mind-Blowing Phenomenon Occurs

For two years, I struggled building the institution dedicated to helping young women achieve their dreams. Because we were operating a non-profit, we had to have a way to deliver reporting to the government. If we didn't, they could shut the whole thing down.

In the world of marketing, there seems to be a strange phenomenon that occurs almost magically. Here I was, working my tail off day and night on my business, pushing myself as hard as I could to move the ball forward.

It seemed like no matter how hard I toiled, my efforts blew back in my face. I experienced rejection, disappointment and even humiliation.

Suddenly things started happening. Almost overnight, I experienced a flood of activity and opportunities that rocked my world! Partnerships, sponsorships, teaching opportunities, as well as speaking engagements started pouring in very quickly.

Finally, I had the means to showcase a performance report that validated the project. Because of this success, I was able to get the grants needed to push the vision forward.

The best part of these astonishing events — my mother and I were no longer on our own, we were able to bring high-voltage talent into our fold. *This helped us set and achieve bigger, more ambitious goals with our enterprise!*

"Thank you Gwendolyn, that was so informative and I learned principles and strategies that will help me to develop a winning business, you were awesome and offered great strategies."

L. Williams - Rochester, NY

"Finished coaching call number #2 and in 60 minutes we established my vision and mission, established policies for my business, identified new systems to free up my time, created the framework for a training manual for interns and staff and we had 5 minutes to spare."

L. Matthews - CEO, Illumination Counseling & Coaching, Lawrenceville, GA

How To Get On The Fast Track

Friend, perhaps you have tried other business consultants, or marketing gurus and you found that you just got just mediocre results. Maybe they didn't understand your particular business, or flat-out didn't have the goods to take you to the next level. ***That's where I can help you.***

As I've already told you, I have almost 2 decades of business experience in organizational development, operations and administrative management.

This gives me a multifaceted and profound understanding of what makes an organization like yours tick. It also gives me the know-how to help you get your businesses on the fast track to triumph.

Just so you know that I can deliver, take a look at what more of my clients have to say:

"My experience has been awesome and it has provided me with clarity that allowed me the opportunity to take my business to another level and to see what I could strategically do to enhance my business and myself as a CEO. It provided me with new and innovative tools to govern and manage my business more effectively. Gwen has been wonderful, honest and down to earth!"

- Lolita D. Cleveland, Sr. Consultant, Open Hands Outreach Consulting

"Investing in yourself is crucial: In 60 minutes we established my vision and mission, established policies for my business, identified new systems to free up my time, created the framework for a training manual for interns and staff and we had 5 minutes to spare. I love investing in myself and I love my coach Gwendolyn,"

- Latasha Matthews, Licensed Clinical Counselor, Illumination Counseling & Coaching, LLC

"Governing in Excellence was a priceless experience! As a new corporation, this was so valuable to me. I was encouraged to think and to make goals that were pertaining to my organization. There was much accountability! Gwendolyn is very knowledgeable about business and welcomed all of my questions. That "hot seat" was a challenge! Excellent experience!"

Joyce Jones, CEO, Flower of the Field Ministry

"Gwendolyn's program was exceptional! It has given me key principles to help me manage my business effectively! As a result of this program, I established partnerships, completed articles of incorporation paperwork, defined my business mission and vision."

- Lakita Thompson, CEO, National Association of Mothers & Daughters United Worldwide
