

# **“Warning: This Cutting-Edge Technology Can Reveal Horrifying Behavior — By Your Kids, Spouse, Or Employees!”**

***Spytech’s SpyAgent™ Software Will Protect Your Kids From Cyberbullying  
And Online Predators... Keep Tabs On Unfaithful Partners... And Catch  
Employees Ripping You Off!***

The Internet is a Pandora’s Box...On one hand, it’s the greatest innovation since the light bulb. On the other, it’s one of the most dangerous places on the planet.

A virtual, electronic cesspool of theft, deceit, and sexual perversion like we’ve never seen before—And it’s delivered at the speed of light into your home and business where your children, spouse and employees can have unfettered access.

**Enter SpyAgent™ software by SpyTech.** Using “Stealth-Mode” this revolutionary software protects and keeps an eye on your children, employees and better half...***without them ever knowing it.***

***Your Children Are At High Risk  
From Dangerous Online Criminals!***

Children become Net-savvy very fast. By the time most children in America reach the first grade, they know how to use a mouse, keyboard and surf the Internet.

Most of the time, kids are merely playing online games that are fun and educational. Many of these games are online virtual worlds like **Roblox™** and **Minecraft™**. With games like these, your children have the ability to play and build things, as well as chat and interact with other players.

***However, your child could unwittingly be chatting with criminals!***

Virtual worlds have virtual sex predators lurking on them. These perverts are ***Phishing*** — ***Attempting to gain sensitive information from children about who they are---where they go to school---and where they live!***

**Fact:** 65% of online sex offenders use social networking sites to gain home and school information about the victim.

Another extremely dangerous threat to kids is **Cyberbullying**. Malicious gossiping, hate speech, and trash talk on social networking sites have led to a dramatic rise in teenage suicide.

Further reports and studies from 2014 show:

- **In a 2014 children's poll, half reported experiencing cyberbullying by other kids – 10% to 20% of them experience it repeatedly!**
- **Victims of Cyberbullies are likely to suffer from low self-esteem and consider suicide as a solution to their problem.**
- **A shocking one-third of children polled reported bullies issuing online threats!**

Social media sites like **Facebook**, **MySpace** and **Twitter** are breeding grounds of Cyberbullying. Teens frequently are victims of mean, vicious attacks by others that trash them online for entertainment, or to just embarrass them.

***Consumer Reports conducted a study and found that one million children were brutally harassed or subjected to cyberbullying on Facebook alone during 2014.***

### **Protect Your Kids With Industry-Standard Technology**

Using **SpyAgent™** software, your child will receive a high level of protection that is unparalleled in the industry. SpyAgent offers your children this bundle of protection:

- ✓ **SpyAgent's Monitoring System tracks all social networking sites accessed. It also records transcripts of all email, and attachments sent.**
- ✓ **Spy Agent captures both sides of chat conversations. Record what was said on applications like MSN Messenger, G-Chat, Skype and Excite — You'll be able to easily see what was said where it came from!**
- ✓ **Prevent your kids from accessing harmful material by using SpyAgent's Site-Blocking Tool. You can even block entire**

## **categories of sites like dating, porn, and gaming – Thwarting children from going to destructive sites in the first place!**

"Thank you! I use this to monitor my kids Internet usage, Every parent should know about this. Thanks again - your support team is wonderful."

Steve M.

"I bought SpyAgent a few months ago on-line. It downloaded and worked fine. Helped me "discover" some stuff about my kids and helped greatly in correcting behavior....thanks!"

Shawn H.

Using SpyAgent™ Immediately...*

## **Are Your Employees Robbing You Of Precious Time And Money?...Or Worse – Leaking Your Company's Security And Secrets?**

***Ever Wonder Why Employees And Subordinates Minimize Their Computer Screens Every Time You Walk By?***

The Internet is a very distracting tool; even decent, hardworking people are sidetracked by it. It's extremely easy to check email, send a message or look at irrelevant sites.

Dishonest employees will use your valuable company time gaming, watching porn, chatting with friends and looking for a better job.

**This is costing your business BIG MONEY!**

**Fact:** Forbes magazine reported that nation-wide, employees chew up **\$175 million** in just two days during the month of March alone!

Forbes also reported:

- **A disturbing 39% of employees were wasting at least an hour a day**
- 21% were wasting 2 to 5 hours
- **At least 8% were goofing around most of the entire work day**

### **Porn Can Cause The Biggest Trouble At Work**

Recent studies by Neilson Ratings have found that 25% of the adults at work are looking at Internet pornography. 70% of this activity occurred between the hours of 9AM and 5PM during the normal workday.

**Not only is this behavior eating up company time and money, but it can also land you in serious legal trouble!**

Employees that look at porn online get noticed by other employees. Many of their coworkers are the opposite sex, or may have serious religious convictions. *This can lead to sexual harassment and workplace legal action if not corrected.*

Not only that, but your company's Internet bandwidth will be drained by employees looking at porn images and video as well. Your business's profits, productivity and reputation could all get wasted due to this behavior.

### **Your Company's Secrets Compromised**

As you know from watching the news, trade secrets and important company data can easily be leaked. If it can happen with highly sensitive government files — it can happen to you.

The biggest threat to businesses are irate employees that feel they have been offended by their employers.

**Fact:** A study conducted by the Secret Service shows that 92% of leaked information and other subversive measures by employees were due to "negative work-related events". ***In other words, an overwhelming number of pissed-off employees leak valuable company files after poor job performance reviews!***

Not only that, but a mad employee can also:

- **Steal customer databases to start their own business**
- Sell trade secrets like recipes, engineering plans, blueprints, and manuscripts

- **Leak info that can damage the company's reputation**
- Point out overlooked deficiencies to government regulators

***SpyAgent Software – Catching and Identifying Employee Abuse!***

When you consider the costs of lost employee time, sexual harassment problems, and damage by infuriated employees, the price of protecting your interests with SpyAgent's software is very minimal.

SpyAgent can covertly catch violators by:

- ✓ **Taking screen-captures so you can see the exact pictures your employees have been looking at.**
- ✓ Giving you detailed, and printable graphic log reports highlighting your employee's top activities... *You'll be able to see exactly where they've been spending their time during the work day!*
- ✓ **Allowing you to see email correspondences and attachments sent during company time. You'll find out fast if someone is leaking company secrets and compromising your security!**
- ✓ As an administrator, you'll be able to block employee's abilities to launch harmful applications and viruses –*Protecting your company's Intranet from malicious attacks!*

`"Fantastic product!! Got the snippet of information required to get rid of an abusive employee.`

`Thanks again for your help."`

`Paul`

`"Your promptness of service and support is fantastic. I recommend your software to many of my peers in the Information Security field. Thanks for a great product!"`

`William B.`

## **Online Infidelity...Is Your "Better-Half" Getting Ready To Dump You?**

The Internet has made it very easy for your spouse or partner to cheat on you. Most double-timers don't think that online flirting by chatting is cheating...That's just the way they justify it.

The sad reality is divorce rates and breakup occurrences have risen dramatically since the Internet has gone public.

**Fact:** According to the Academy of Matrimonial Lawyers, Facebook, Myspace, YouTube, Twitter and LinkedIn are main players in divorces over the last five years.

If the Internet is the Information Highway, then there are a lot of hook-up hotels along its way. Consider this:

- **Popular online Websites like EroticAffairs.com, Ashley Madison, and Affairs Club are dedicated to encouraging people to cheat!**
- Single men and women start relationships with people they met online. Many times, these people, are predators that use the Internet to plan stealing and extorting money from them.
- **Statistics show that online porn addiction, overwhelmingly plays a major role in legal break ups with spouses or significant others – *leaving behind parentless children and financial ruin in their wake***

With SpyAgent software, you'll be able to keep tabs on your significant other and confront them before things go too far. Our software is loaded with these protective measures:

- ✓ **SpyAgent has a patented "Stealth-Mode" – *you'll be monitoring Internet activity without them ever knowing it!***

- ✓ Keeping a log on social media and "hook-up" sites to track where your significant other is spending time
- ✓ **Record, view and print chat logs to from applications like MSN Messenger, Google Chat, AOL Instant Messenger, Skype and many others**
- ✓ Log and view all email events sent by your computers. See all SMTP and POP3 messages and attachments. *You'll know exactly who your better-half is writing to and what they're saying!*

"...your software works perfectly. In fact, I discovered my girlfriend has been cheating on me for as long as we have been dating. Even worse, she picked up the pace once she moved in with me.

Thanks for the help. I've repeatedly asked her about some of her behavior that's made me wonder and she's repeatedly explained it away or flat-out lied to me. Your product has provided exactly what I needed, and I'm only sorry that I've had to use it to protect myself..."

David H.

*Find out ASAP if your "loved one"  
is cheating on you! To use  
SpyAgent and automatically learn the truth...*

**Put Your Mind At Ease!**  
**SpyAgent Is Your "Catch-All" Software That**  
**Will Protect Your Assets... And Your Children!**

Whether it's keeping perverted sex offenders away from your kids, a cheating spouse, or infuriated and lazy employees...SpyAgent can catch them with their "pants down"--- **and they'll never even know how you did it!**

As soon as SpyAgent is on your hard drive, you'll have unlimited protection **24/7/365** for your kids, business and relationships. This is technology that never gets tired of keeping tabs on **YOUR** valuable assets.

Consider these online spy tools:

**Keystroke Surveillance** — Not only can you log and keep track of keystrokes, but you'll be able to see the time, and window they were typed into. *This will give you intimate knowledge of what your suspect is searching for online.*

**Covert Password Capture** – Passwords are captured and flagged for easy viewing. During screenshot capturing, SpyAgent displays related screenshots next to the keystroke entries. *You'll not only be able to view the websites your suspected party was logging into, but you'll also be able to log in and check their account —using their password!*

**Website Activity Log** — View which sites have been visited, browsers used, and searches performed. You'll have access to the name that went to the site, how long they were there, and what pages they were on. *There'll be no doubt in your mind what was looked at... and for how long!*

**Mouse Monitor** – This tool shows you exactly what page the user was on and what links were used. — *Find out **precisely** what the user was interested in and what he clicked on!*

**Virtual Viewing & Control** — Connecting to your computer's desktop, you can watch activities AS THEY HAPPEN. Not only that...but you'll have TOTAL control of the target computer's keyboard and mouse. *This'll send a clear message to the guilty party that you're on top of the situation and aware of what they're up to!*

Need more proof? Read these testimonials...

"I believe your product helped us keep our youngest off drugs. WE were right on top of what was going on.

My husband and I have said maybe when our son is 30 we will tell him how we knew what was going on and when. Your product very well may have saved his life.

One of his friends died of an overdose last Nov. 4 others were arrested 2 years ago. 3 are still on probation the 4th one is in state prison.

These are all great kids just got messed up with the wrong stuff. Your product really gave us an INSIDE to what was going on. EVERY parent of a preteen or teenager should have it on their computer. Feel free to use my name if anyone needs a testimonial to your product."

We'll gladly recommend your product to our friends."

Marilyn P.

"I really appreciate the rapid response. A GREAT product with excellent customer care. Top notch operation."

Rob G.

VERY Satisfied Customer

"To Whom It May Concern,

I want to let you know that your software was instrumental in my catching my husband at several things. First and foremost, he was viewing pornography that had very upsetting titles to me. Although not true "child" porn, the titles included illegal ages. He's been hitting "married but looking" websites too!

Once I knew the depth of what was going on, I copied the hard drive and sent the original to a "computer forensic" person. My 15 year old daughter and I are on our way to exiting a potentially dangerous relationship."

(Name withheld for privacy)

"The help provided to resolve my recent problem was exceptional. Your staff member was quick to respond and guided me through the resolution process. I expected this process to take several day when in fact it took less than 48 hours. Thanks again to the entire team."

Regards,

Joe V.

"You have some GREAT software. My girlfriend's son visited for a couple months and pretty much camped out on KAZAA. Within a month or so after he left, that computer was rendered virtually useless. I was groaning at the prospect of having to wipe it clean and load everything all over again. I bought your software, loaded it...and the pop-up demons have been purged! Helped me "discover" some stuff about my kids and helped greatly in correcting behavior....sage is back to normal. Thanks!

This is good stuff. I tried the "free versions" and they didn't do the trick. Yours did."

Dr. David V.

"Thanks for putting out such a great program -- I have no reservations about turning my kids loose on the net knowing that I can track their every move! It puts us parents back in the driver's seat when it comes to an otherwise scary place for our kids -- the Internet!"

Todd N.

**"...your quick response to my support questions is much appreciated. I can't get support like this from most of the larger companies I deal with. Thanks again!"**

**-Bud P.**

"...You guys are the best! I tried another program first and you needed to be a computer engineer to use it! fast service, easy to use, highly recommend!"

(Name withheld for privacy)

**"Very happy, discussing with Boss about becoming a reseller for the schools here in New Zealand." (Name withheld for privacy)**

"Thanks for all of your help! This is great if you think your teenagers are not being fully honest. :)"

Lynn

**"Nathan,**

**"Thanks again for all of your help. I received my upgrade just fine and I am very grateful. SpyAgent has been a very useful tool in this household. I have a sixteen year old son and a thirteen year old daughter, he has a wondering eye, and I use SpyAgent to see what I need to block him from. My daughter on the other hand is a good girl, it's the outside element I have to watch, some of her friends have sent her things that were inappropriate, this helps me identify those children that we don't want associating with ours. I recommend your software whenever I can, I know of a few parents that have taken my advice ... Anyway, thanks again, you have been a Godsend."**
